

THE BIG 5 + 1 REASONS TO BELIEVE IN GOD

OBJECTIVE: A VERY SHORT ARTICLE AND IN LARGE TEXT FOR EASY READING EVEN IF YOU HAVE FARSIGHTEDNESS, TO CONVINCING YOU OF GOD.

INTRODUCTION

I said it will be short! (4 pages in total)

THE BIG 5 + 1

All YOU have to do is the following:

- 1) Please spend a few hours watching nature channels such as Discovery or National Geographic on **Birds**, say 5 episodes.
- 2) Please spend a few hours watching nature channels such as Discovery or National Geographic on **Insects**, say 5 episodes.
- 3) Please spend a few hours watching nature channels such as Discovery or National Geographic on life in the **Ocean**, say 5 episodes.
- 4) Please spend a few hours watching nature channels such as Discovery or National Geographic on **Animals** (reptiles and mammals), say 5 episodes.
- 5) Please spend a few hours watching nature channels such as Discovery or National Geographic on **Plant life**, say 5 episodes.

- 6) And for the “Plus 1”, please spend a few hours watching a medical channel on the intricacies and perfect designs of the **human body**.

The above excludes the beautiful rivers, mountains and other landscapes that you can also include in your views...

Before reading on, first make sure you followed step 1 to 6 above!?

Did you follow step 1 to 6 above yet? If no, you are wasting your time reading on!

Assuming you did watch all the suggested episodes above and you look past the beauty and colours during each episode and realise the impossible designs and processes, then your (spiritual) eyes should open up. Some would argue “evolution” did this, but this article is not intended to address that here, but even if Mr “Evolution” was at work, it **needed intelligence** to help develop all the unique beauties and features in nature...

If after watching the above channels and their wonders still do not convince you, go to the next paragraph else THANK YOU at last, now you need someone with knowledge for more info and guidance to help you go forward from here. You may also skip the “Still did not convince you” paragraph that I still believe you will probably read due to human curiosity.

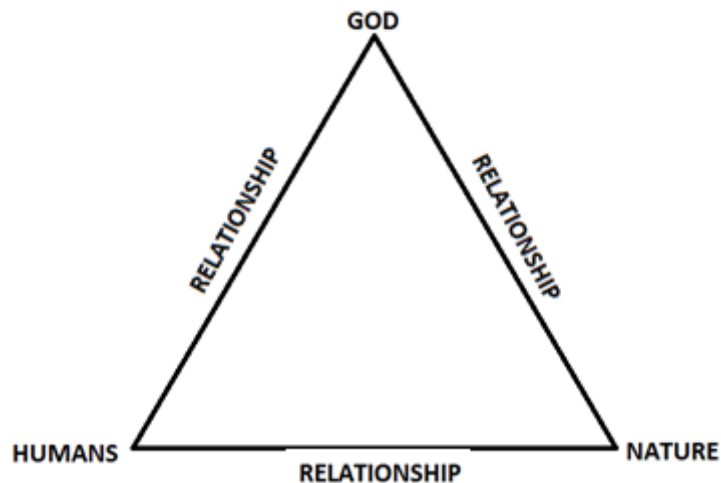

STILL DID NOT CONVINCING YOU?

Perhaps I should become harsh and say ugly things like *“what are us humans here on earth for? All we do is mess up nature. We “progress”, but our progression still does not take away the stress and hardship on earth. If us humans disappeared, all animal and plant life would thrive. There is in any case no HOPE without a God, as we all going to die and disappear apparently forever, so what is the point!. Live goes by so fast that before you know it, you back to dust”*.

The above is basically what you implying if you do not believe in God. Without hope and belief of an afterlife, what is the purpose of at least humans? We are a greedy race consuming the natural resources with a short term future. Now skip the next paragraph , watch more nature channels and think hard and deep about the wonders of nature

THE NEXT PARAGRAPH

There is a “Golden” triangle” that God wants to be in place, namely:

If these relationships are not in place and perfectly balanced, this triangle will collapse, as Humans are the “weakest link”. God made everything perfect and in balance, we humans can only maintain the balance if we believe and turn to God for guidance and help.

THE CLEAR WARNING

This verse can be found in the Bible with a clear message AND warning:

²⁰ For since the creation of the world God’s invisible qualities—his eternal power and divine nature—have been clearly seen, being understood from what has been made, so that people are without excuse. – Romans 1:20

Nature out there shows clearly God’s creation and those Discovery and National Geographic channels will facilitate and support this, so you should have no excuse that there is no God.
